

Water Shortage Direction

Section 329 of the Resource Management Act 1991

The Tasman District Council considers there is a serious temporary shortage of water in the following zones and the taking/use of water is to cease.

Cease take is necessary to help prevent further reductions in river flow.

A cease take will come into effect as of Monday 10 February 2020 for holders of consents to take water from the Moutere Surface Zone. Affected consent holders are being advised in writing.

The position will be reviewed at the next meeting of the Dry Weather Taskforce on 11 February 2020.
