Only rain and clean tap water should go down your outside drains.

Outside drains, roofs and road gutters are directly connected to waterways, estuaries and the beach, so we need to be careful how we dispose of our unclean run-off. Please follow the guidelines below.

- Run-off from washing your car
- Any litter (including pet litter)
- Cleaning chemicals
- Run-off from driveway and roof cleaning* (even environmentally friendly chemicals)

HOW SHOULD I DISPOSE OF THESE?

Divert or sweep onto grass – the water can be filtered by plants and soil layers.

**Disconnect your downpipes for any roof cleaning.*

- Water from cleaning water-based paint brushes* (even environmentally friendly paints)
- Emptying a chlorinated swimming pool (book a time with Council first)

HOW SHOULD I DISPOSE OF THESE?

Ensure it is well diluted and drain into a laundry sink or toilet (inside drains go to the sewage system).

**Check paint store websites for ways to clean paint brushes safely.*

- Solvents
- Oil and fuel
- Chemical concentrates
- Left over paint and glues
- Concrete wash*

HOW SHOULD I DISPOSE OF THESE?

Ensure it is not leaking, seal in a suitable container and take to your local resource recovery centre.

For containers with residual chemicals follow the hazardous waste process, see Council website for details

**Seal off drains and divert onto garden.*
